## Human Genetic Disorder Project Brainstorming

### **Genetic Disorder:**

- Cause  
(Which chromosome? Which gene?)
- Inheritance  
(How is it transmitted...Is it dominant, recessive, sex-linked, etc?)
- Incidence  
(How many people, males/females, race, location?)
- Symptoms
- Treatment

- Testing/Screening
  
- Prevention  
(Can it be prevented? If so, how)
  
- At least 3 other interesting facts
  - 1.
  
  - 2.
  
  - 3.
